Putting Waypoints

Onto an Oudie N

First of all you will need to have signed up and created a Naviter See You account which you will have done when you got the device. You then need to go onto your computer and head to SeeYou Cloud and sign in.
 I SeeYou

Upload tracks and cup files

2. Once signed in you need to find the icon that says upload – the same one you use to upload you flight to analyse it. From here you then just need to upload your waypoint file.

3.

From this screen upload your way point file and it will download them to your SeeYou Account

Upload Waypoints and Flights FLIGHTS DEFAULT SETTINGS My flights Make flights public				
Drag files here (igc, cup, xctsk, fit, gpx, tcx) BGA 2021 SeeYou.cup 239.0 kB Done	0	REMOVE	OPEN	
OPEN ALL FLIGHTS				

Go onto your Oudie N. (Make sure it has an internet connection)

Go to Settings – Waypoints

4.

Select the file that you have just uploaded and now your Oudie has waypoints
